

# Pertinent Pro

## 360 POWDER

FOR THE CONTROL OF CRAWLING INSECTS

### Your Best Choice for Pest Control

- ◆ Kills insects resistant to chemical pesticides
- ◆ Superior performance, research based proven
- ◆ Powerful powder to penetrate cracks and crevasses
- ◆ Safe for people and the environment when used as directed (FIFRA Exempt)

### The Power of Pertinol™

This powerful formulation delivers a One-Two punch

1. The plant-based active ingredients are strengthened by our proprietary “booster” Pertinol™. The plant based active ingredients are time-released from the powder, extending the duration over weeks.
2. The silica-based powder abrades the cuticle of the insect's exoskeleton, causing disruption and dehydration.

### A Formulation that Dislodges the Pests

The powder is specifically formulated to go deep into cracks, crevasses, wall voids, and everywhere the insects hide. In addition, it has a unique “flushing” effect that dislodges the insects from hiding to come into contact with our active ingredients. This is where their journey will end...

## Directions for Use:

1. Apply in and around areas where insects crawl, live, or hide - cracks, crevices, void areas, gaps around walls, baseboards, moldings, cabinets, pipes, electrical outlets, window, door frames, and appliances.
2. Apply product using standard dusting equipmet such as a bulb or bellows hand duster, compressed air duster, or electric duster.

## Dose:

Apply at a rate up to 10 oz per 100 square feet of treated area. Repeat as necessary.

Contains:

**Geraniol.....4.0%**

**Thyme oil.....4.0%**

## Superior Performance and Proven Efficacy
