

Pertinent Pro

SILVER-BULLET

Your Best Choice for the Control of Silverfish

- ◆ New active ingredients for use in Silverfish control
- ◆ Kills insects resistant to chemical pesticides
- ◆ Superior performance, science-based efficacy
- ◆ Safe for people and the environment (FIFRA exempt) when used as directed

Silverfishes (*Lepisma saccharina*) are a Nuisance

They contaminate food, damage property, and trigger allergies.

They are incredibly fast and difficult to control. When disturbed, they quickly dart out and find a hiding place. The best way is to trap them and eliminate them.

With Pertinent, You Have a “Silver Bullet” to Control Silverfish

1. Insects enter and feed on a specially formulated matrix containing eugenol.
2. Silverfish are killed without any sprays or liquids.
3. 10X more effective at killing silverfish than the leading product containing boric acid.

Directions for Use:

Open the pouch containing 12 cards. Do not open or deform the cards. Place them in areas of silverfish infestation. Control will be seen in 1 to 2 weeks.

Each card contains:

Eugenol.....0.6%
