# P3 Poultry Pest Powder in Poultry Facilities

***Available in a 40 lbs pail***

## How to Use

*Before treatment, turn off fans and leave off until the product has settled  
(about 15 mins after application)*

- Apply using a powered duster (Stihl SR 450 or Tomahawk TMD14)
- Application rate 4-6 lbs. per 1000 sq. feet of facility
- Apply when cooler so fans can be turned off during and for 15 mins. after application
- Make sure to treat gaps along walls and apply to harborage areas where insects hide: *nest boxes, belts, behind sheeting and framing, belts, in attics*
- Remove covers from boxes and equipment to expose hidden bugs
- Reapply 4-6 weeks after treatment, or as needed for maintenance
